Valentina Sisti 1952657

Introduction

The idea behind CiakTime comes from the fact that nowadays there are a lot of movies out both in theatres and in streaming platforms, so that cinema lovers can satisfy their needs to stay updated with the latest movies and keep track of them. Also they may want to know on which streaming platforms they can found the movies. Finally they could have the necessity to interact with other cinema lovers about their favourite movies or share their opinion about the movie with the community through reviews.
